

Hello, **AIMindScape** subscribers!

We're back with another exciting edition of AIMindScape to fuel your curiosity and keep you at the forefront of AI advancements. This week, we have handpicked some phenomenal stories and insights that are making waves in the AI landscape.

From savvy investments in AI stocks to the latest breakthroughs in machine learning, our newsletter has information designed to keep you informed, inspired, and engaged. So let's dive into this week's treasure trove of AI knowledge and innovation.

Warmly,

The AIMindScape Team

World's first radio station with an AI DJ

AI on the Airwaves

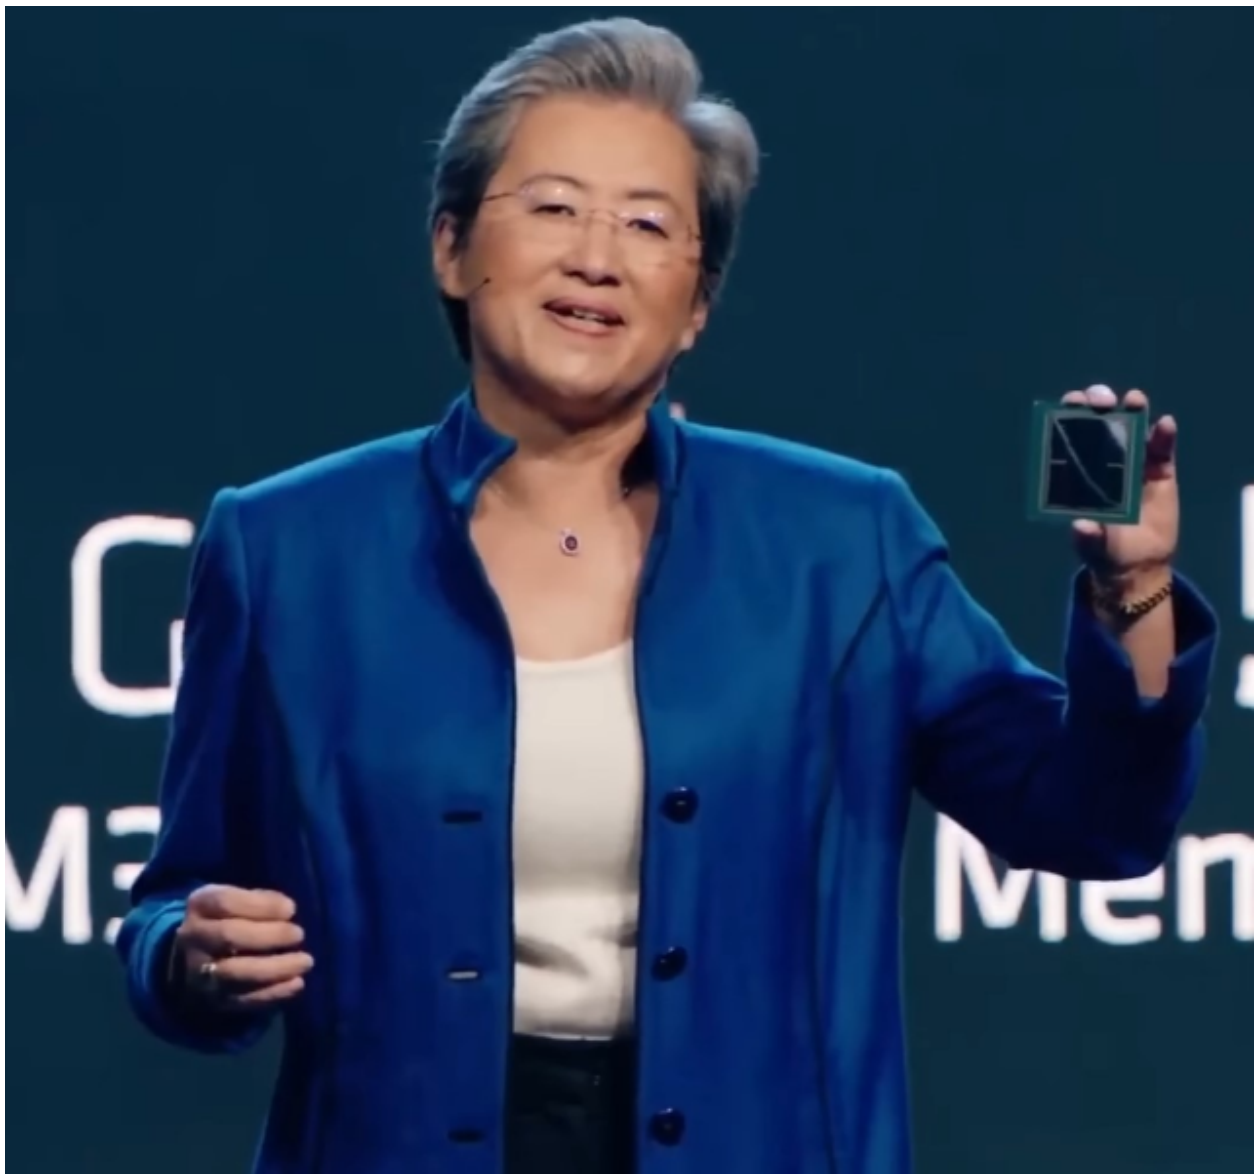

AI on the Airwaves: Portland's Live 95.5 has introduced "AI Ashley," an AI DJ that sounds almost identical to the station's midday host, Ashley Elzinga. **AI Ashley** is powered by Futuri Media's RadioGPT tool, which uses GPT-4 to create scripts based on current news and social media content. The AI DJ will be on air from 10 a.m. to 3 p.m. daily. While AI Ashley handles the radio hosting, the human Ashley will engage in community activities and manage social media. This innovation has sparked debate on Twitter, with some praising the station for consistent content, while others express concern about the impact of AI on jobs. Meanwhile, AI is also making waves in the music

industry and publishing, with iHeartMedia investing in AI and Apple rolling out audiobooks narrated by AI voices.

AMD Jumps on the Generative AI Bandwagon

Instinct MI300X

CNET Highlights "AMD Reveals MI300X AI Chip"

AMD's AI Awakening: Looks like AMD is waking up from its slumber in the AI game. The chipmaker, known for its Epyc server CPUs, is flexing its muscles with some serious hardware. AMD just dropped the Instinct MI300X, a supercomputing hybrid processor designed to run ginormous AI models. How ginormous? We're talking 40 billion parameters in a single GPU, and AMD is dreaming of doubling that. The MI300X is packing 153 billion transistors and up to 192GB of high-bandwidth memory (HBM3). It's like the **Hulk** of AI processors. But wait, there's more! AMD is also making moves in software, with its ROCm open-source GPU compute programming giving Nvidia's CUDA a run for its money. And let's not forget, Hugging Face is cozying up with AMD, optimizing its open models for AMD's chips. AMD's AI ambitions are clear: it's coming for Nvidia. Let the AI chip wars begin. AMD's CEO Dr. Lisa Su talked about how AI will become pervasive in computing. At its June 13th Data Center & AI Technology Premiere Event in San Francisco, Dr. Su called AI its largest long-term opportunity.

EU Lawmakers Pass Landmark

AI Regulation Bill

EU's AI Playbook: The European Parliament just passed the Artificial Intelligence Act, making it one step away from adopting the world's first major rules and regulations on AI technology. The AI Act classifies AI systems into four risk categories, from minimal to unacceptable. Systems that fall under “**unacceptable risk**” (like social scoring and predictive policing tools) would be banned. The act also puts AI systems focused on children and hiring practices under the microscope. Corporations that don't play by the rules could face fines of up to \$33 million or 6% of their global revenue (yes, that's billions for the big boys like Google and Microsoft). The EU is hoping to make

this AI Act timeless, as it's their golden shot at setting up robust AI guardrails. Meanwhile, the U.S. and China are in a tug-of-war for global AI dominance, with the EU kind of just waving from the sideline.

AI Stocks

Taking Wall Street by Storm 📈

Company	Market Capitalization
Microsoft Corp. (MSFT)	\$2.5 trillion
Amazon.com Inc. (AMZN)	\$1.3 trillion
Nvidia Corp. (NVDA)	\$977 billion
C3.ai Inc (AI)	\$3.95 billion
Alphabet Inc. (GOOGL)	\$1.6 trillion
Micron Technology Inc. (MU)	\$75.7 billion
Tesla Inc. (TSLA)	\$654 billion

Buckle up, tech enthusiasts! This month, **Forbes** has dropped a treasure map for investors hunting for the next big thing in AI stocks. Now, we all know that the world of AI has been stirring up some serious buzz, especially after the release of ChatGPT in November 2022. But, before you dive headfirst into this enticing investment pool, let's break it down

- **The Software Titan** Microsoft (MSFT): When it comes to AI, Microsoft isn't playing around. They've got this "bromance" going with OpenAI, investing a whopping \$10 billion. Bing is getting smarter, and Edge is edgier with AI. Microsoft is to AI what peanut butter is to jelly.
- **The Everything Store** Amazon (AMZN): Amazon's AI game is like Black Friday on steroids. Alexa, Amazon Go stores, you name it. Underneath the hood, AWS is the cash cow, with AI tools like SageMaker being the cream of the crop.
- **The Chip Maestro** Nvidia (NVDA): If AI was an orchestra, Nvidia's GPUs would be the virtuoso violinists. They're crucial for those heavy-lifting machine learning pieces. The A100 chip is like the Stradivarius of the AI world. Nvidia is riding the AI wave like a pro surfer.
- **The Purebred** C3.ai (AI): This is an AI thoroughbred, folks. No messing around with side gigs, C3.ai is all about AI. Though, be warned, it hasn't turned a profit yet. Investing in C3.ai might be like dating a rockstar; thrilling but unpredictable.
- **The Search Engine Brainiac** Google/Alphabet (GOOGL): Google's been hitting the books hard, and AI is its major. With cloud computing AI products and a chatbot named Bard, Google's trying to be the Shakespeare of AI. But, a hiccup in Bard's debut reminds us that all the world's a stage, and even AI can flub its lines.
- **The Memory Whiz** Micron Technology (MU): Micron's memory chips are like the brain food for AI's insatiable appetite for data. Though, it's a roller-coaster ride in the memory chip biz. Micron's having a rocky road; expect turbulence.

- **The Electric Dreamer** Tesla (TSLA): Elon Musk, the Willy Wonka of tech, has Tesla speeding into AI. Autonomous driving? Check. Robotics? Check. But, critics are side-eyeing Tesla like, “Aren't you a car company?”

Forbes' Seal of Approval: These stocks come with a Forbes stamp, but with some caveats. Market cap above \$1 billion? Check. Positive revenue? Check. AI involvement? Double-check.

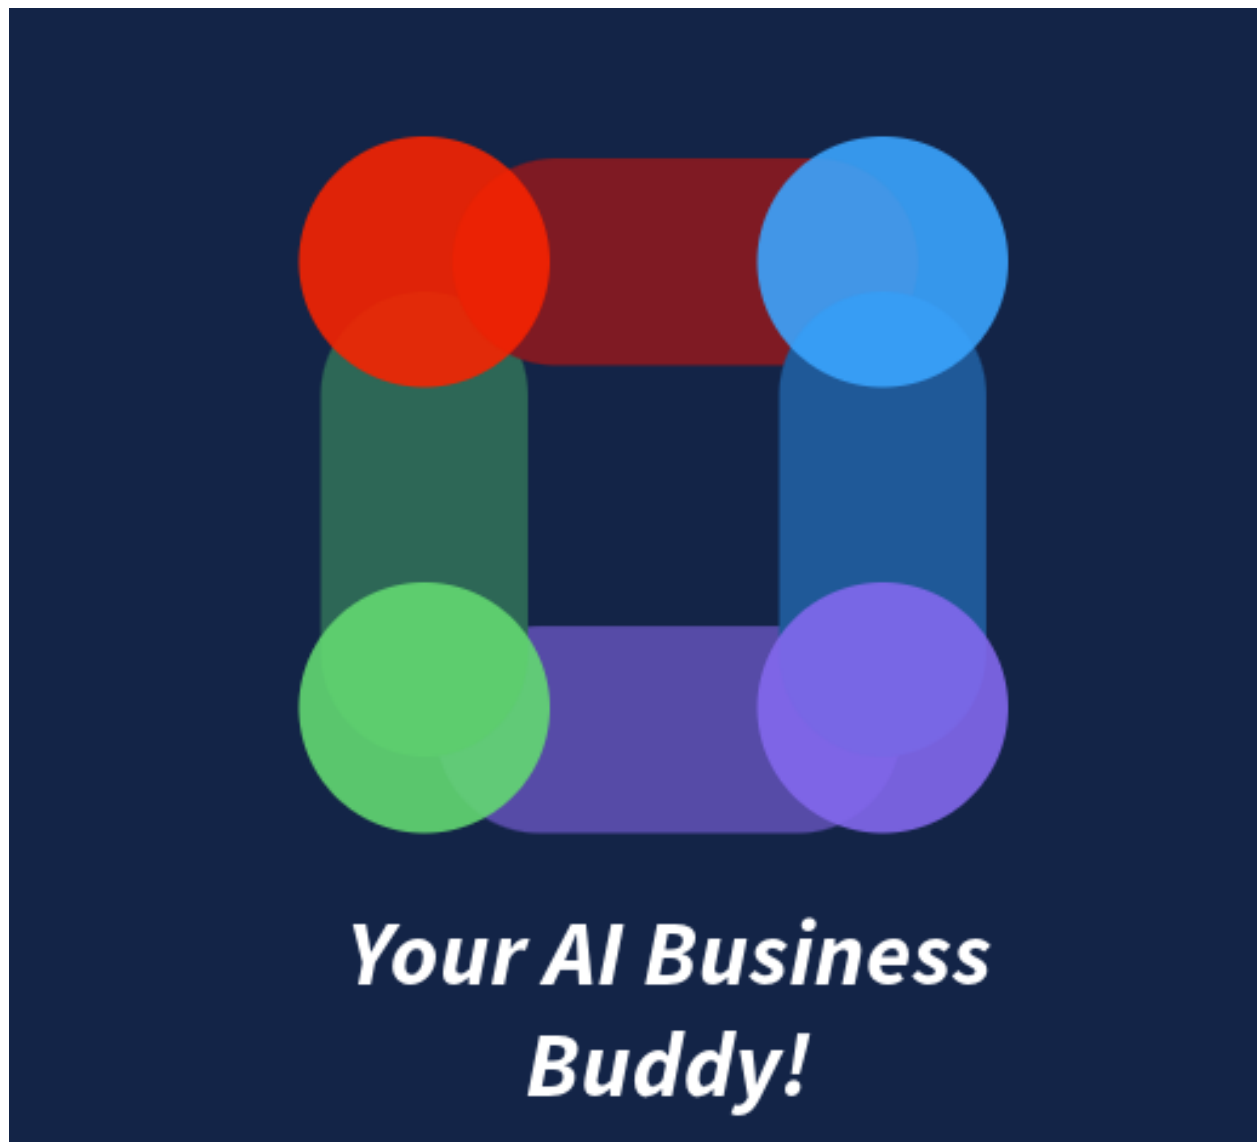

🔮 The Crystal Ball: As dreamy as AI stocks sound, *remember they're like a double espresso shot*; high energy but can make your hands shake. Forbes' list is curated, but always do your due diligence. Consult a financial advisor, and don't put all your eggs in one AI basket.

Disclaimer

◆ **AI Tool Spotlight** ◆

Jigso's Sidekick

Alright folks, it's time to spice up your Slack game with some AI magic! Meet **Jigso's Sidekick**, the newest whiz-kid on the block. Imagine having a hyper-intelligent, AI-fueled wingman right there in your Slack workspace. "What's the big deal?" you ask. Well, let's dive in!

What is Jigso's Sidekick? Hold on to your coffee mugs because Sidekick is an AI-powered Slackbot designed to be your very own business ninja. Think of it as Siri's brainy cousin who decided to get an MBA. This nifty tool lets you

chat with your business apps using nothing but natural language. Yep, no more wrestling with tabs or fumbling through files.

What Can It Do? Think of Sidekick as a swiss army knife for your business needs.

Here's the rundown

Query Documents: Need to find that report from three months ago? Just ask Sidekick!

Track Topics: Keep an eye on important topics without breaking a sweat.

Set Reminders: Never miss a deadline or forget a meeting.

Summarize Conversations: Sidekick can condense those lengthy Slack convos into bite-sized nuggets of wisdom.

ChatGPT Integration: The cherry on top! You get FREE access to ChatGPT 4.0. Craft sizzling emails, concoct killer playbooks, and whip up creative content like a pro.

💡 **Why Should You Care?** In this age of information overload, Sidekick is like having a digital butler who can sift through the noise and hand you exactly what you need on a silver platter. It's all about streamlining your workflow and boosting productivity.

🔥 **The Bottom Line** Jigso's Sidekick is not just a Slackbot; it's a productivity powerhouse that's here to make your work life a breeze. Whether you're a startup guru, a corporate warrior, or a freelancer, Sidekick is ready to be your, well, sidekick!

Signing Off For The Week

And there you have it, folks! We've reached the end of this week's AI odyssey. We hope you found the insights and stories in this week's AIMindScape newsletter as thrilling as we did.

Don't forget to share AIMindScape with friends, colleagues, and fellow AI enthusiasts.

If you have any feedback, suggestions, or AI breakthroughs you'd like us to feature in the next edition, don't hesitate to reach out. We value your input immensely.

Warm regards,

The AIMindScape Team

P.S. May your algorithms always converge and your data be ever bountiful.
